# ANJAN SRIVATHSAV

## Full Stack Developer

+1-(647)-979-9370 • gangishettianjansrivathsav@gmail.com • https://www.linkedin.com/in/anjan1729/ • Toronto, Ontario

## Summary

A Software Developer with 5+ years of experience in application development and cloud Infrastructure, including AWS, and GCP. Expertise in Core Java, Spring Framework, J2EE,Angular and the entire SDLC, from scalable web application design to complex system integration. Proficient in performance tuning, automation, and CI/CD processes, with strong coding skills in scripting languages, Object-Oriented design, and troubleshooting. A team player with a proactive mindset, strong problem-solving abilities, using data structures and Algorithms accountability and a focus on delivering high-quality, innovative solutions.

## Experience

### Telus.
Toronto, Canada

**Software Developer Co op**
01/2024 - 08/2024

- Improved database performance by 30% by transitioning MySQL queries to BigQuery in GCP.
- Enhanced security integration by implementing OAuth2 by conducting multiple POCs.
- Resolved 50+ operational support tickets by addressing issues with in-scope tools.
- Ensured seamless data access by migrating Splunk to Cloud Environment.
- Developed Jobs and transformations in ETL tool Pentaho worked on API Design and integrated REST APIs and SOAP APIs.

### Global ERP Solutions
Mississauga, Canada

**Full Stack Software Developer**
08/2022 - 12/2023

- Designed and implemented college and program services for data manipulation.
- Improved user management reliability by developing microservices architecture handling sessions and user profiles.
- Produced detailed technical design documents for software architecture.
- Resolved software issues by efficient troubleshooting in development and production environments.
- Facilitated seamless integration by coordinating UI and backend development teams.
- Worked on Debugging UI bugs and application testing and implemented new features.
- Boosted API performance by designing backend Web services for new implementations.

### Oracle
Hyderabad, India

**Application Developer SDE**
09/2021 - 07/2022

- Eliminated known backend bugs, enhancing system stability and performance.
- Resolved daily customer issues, improving customer satisfaction and retention.
- Implemented feature-level product changes, boosting functionality.
- Enhanced UI by fixing bugs and implementing responsive web designs enhancements .
- Developed new sub-inventory features, improving batch processing efficiency.
- Improved API integration by securing system changes, enhancing cross-project functionality.
- Automated export/import of CSV files, handling data entries daily.
- Resolved API integration issues by coordinating cross-team efforts, reducing data conflicts.
- Performed automated testing of web applications using Selenium and done unit testing.

### Vassar Labs
Hyderabad, India

**Software Developer**
07/2019 - 09/2021

- Worked in Agile(Scrum) environment to collaborate with cross-functional teams.
- Responsible for implementing a backend framework for the computations and service level implementations using Spring Java(Object-Oriented Programming language).
- Responsible for implementing a backend framework for efficient extraction, transformation, and up- loading of raw CSV data across multiple assessments and performing Impact Analysis, proprietary heuristics on the data to create custom reports.
- Worked closely with the UI team and also the app team to resolve the data entry issues and troubleshooting Kafka topic issues.
- Responsible for taking the priority bugs and closing it.
- Communicated with multiple teams and resolved the data conflict and worked on data management.
- Worked on the Seasonal Water Computations with the new batch processing logic and automated the pipeline.
- Responsible for the deployment of the backend and the UI changes at the end of the sprint

# Education

**Lambton College**
PGDM in Full Stack Software Development

Ontario,Canada
08/2022 - 08/2024

**Indian Institute of Information Technology**
Bachelor of Engineering in Computer Science and Engineering

Gujarat, India
08/2015 - 2019

# Skills

Java 8 · Python · JavaScript · ES6 · OOP · Angular · React · Typescript · C# · C++ · OAuth2 · Java Spring · Hibernate · PHP · JPA · J2EE · JSP · Spring Boot · Spring Data JPA · Spring MVC · REST API's · NodeJS · Junit · JDBC · Oracle · Oracle SQL · SQL · PL/SQL · SSO · Cassandra · PostgreSQL · MongoDB · Maven · JSON · XML · GCP · DevOps · GKE · Pub/Sub · Git · Github · GitLab · Linux · Bash · Yaml · JWT · HTML · CSS · Microservices · Jenkins · Test Automation · Selenium · Babel · Jest · SonarQube · Protractor · CI/CD · Jenkins · Kubernetes · Artifactory · Docker · Confluence · NoSql · Problem solving skills · Continuous Integration

# Certification

GCP Associate Cloud Engineer Certification — Google

Professional Scrum Master™ I (PSM I) — Scrum

# Strengths

**Technical proficiency**
Expert in Java, Spring, software lifecycle.

**Analytical skills**
Strong skills in scripting, architecture design.

**Quality oriented**
Focus on delivering high-quality solutions.

**Team collaboration**
Proactive mindset and problem-solving.
